(720) 254-7526 | mchenco7@gmail.com | maechen.com

EDUCATION:

University of Colorado at Boulder

May 2026

Computer Science BS, Minor in Business (GPA: 3.932)

- Relevant Courses: Data Structures, Global Engineering, Linear Algebra, Discrete Math, Calculus 2, Physics 1

Herbst Fellow

- Published personal essay in Spring 2023 Colorado Engineering Magazine on how Generative AI impacts the modern experience of what it means to be human.

SKILLS AND INTERESTS:

Technical Skills: Python, C#, C++, JavaScript, HTML, CSS, React, Git, GitHub, Figma

Interests: Hip Hop Dance, Creating Media Content, Classical Music, Snowboarding

PROJECT AND ACTIVITIES:

IMBD Movie Data

March 2023 – Present

- Utilizes C++ to create a movie database using a hash table and a skip list.
- Created custom hash function that minimizes collisions to ensure efficient insertion and retrieval of movies.
- Implemented probabilistic linked list for efficient search, insertion, and deletion of elements.

Silver Hollow Text Based Adventure Game

March 2023

- HackCU-9 Beginner Track Winner.
- Structured and calculated possibilities of player sequence.
- Learned how to generate text images in C++ and SSH key to connect to GitHub.

Google Developer Student Club

January 2022 – Present

- Built custom Google Chat bot with Python on Google Cloud using the ChatGPT and Image APIs from OpenAI.
- Attended coding workshops to gain familiarity with Firebase and Flutter.

Alien Restaurant Command Line Game

November 2022 – December 2022

- Programmed object-oriented classes in C++.
- Includes functions that execute random probability and sorting.
- Map class employs 2D array to track player position.

Capstone Project

August 2021 – May 2022

- Coded real-time frequency processing database in Python.
- Employed local API to integrate sound processing database with WinForms application in C#.
- Used HTML and CSS to design published website that displays my progress journals and resulting application.

LEADERSHIP:

CU Boulder Women of Color in STEM

April 2023 - Present

Treasurer

Boulder, CO

- Efficiently manage and secure the budget by applying for funds from the school's computer science department.
- Organize and create receipts on Excel to submit semester budget reports.

Rocky Mountain AI Interest Group

April 2023 – Present

Executive on Board of Directors

Boulder, CO

- Organize and moderate meetings by constructing monthly agendas and inviting speakers.
- Publicize meetings through media and review draft outgoing emails to members.

Scholars Of Finance

September 2022 – Present

VP of Member Experience

Boulder, CO

- Committed to weekly meetings about understanding public and private markets, equity, direct lending, and securities.
- Completed 7-week leadership development program about ethics in finance and reflected on values to, ultimately, create my own personal mission statement.

Business and Engineering Women in Technology

August 2022 – Present

Scholar

Boulder, CO

- Participated in weekly seminars to develop leadership skills around failure, management, and communication.
- Engaged in workshops about Diversity, Equity, and Inclusion, and the intersections of business and engineering.
